ANALYTICA CHIMICA ACTA, VOL. 210 (1988)

AUTHOR INDEX

Bauer, J.
—, Fontain, E. and Ugi, I.
Computer-assisted bilateral solution of chemical problems and generation of reaction networks 123
Biegler, L. T.
Advances in computer-aided process design 97
Bohanec, S., see Zupan, J. 63

Chuanjie, G.
—, Xiaomin, W., Huawei, Q. and Xiyun, L.
Microcomputer mass-spectral information system with categorized data bases 169

De Maine, P. A. D.
— and Head, D. M.
Problems of hardware and software in chemical information systems 73
Dong, Q.
—, Xu, Z. and Wang, P.
Preliminary study of a scientific data base, the distributed chemical engineering library 181

Fontain, E., see Bauer, J. 123

Gray, N. A. B.
Artificial intelligence in chemistry 9

Head, D. M., see De Maine, P. A. D. 73
Heller, S. R.
Numerical data acquisition, dissemination and retrieval systems 81
Huawei, Q., see Chuanjie, G. 169

Jin, Z., see Renjun, Z. 195

Kanohta, K.
— and Katagiri, Y.
A microcomputer-based ^{1}H-nuclear magnetic resonance search system for spectra 89
Katagiri, Y., see Kanohta, K. 89
Kaufman, J. J.
Ab-initio calculations on large molecules and solids by desirable computational procedures 209
Kaufman, J. J., see Koski, W. S. 203
Koski, W. S.
— and Kaufman, J. J.
TOX-MATCH/PHARM-MATCH prediction of toxicological and pharmacological features by using optimal substructure coding and retrieval systems 203

Leshan, W., see Zhihong, X. 115
Levine, S. P., see Ying, L.-S. 51
Li, D., see Liu, S. Z. 219
Liu, S. Z.
—, Lu, B. T., Meng, Y.M. and Li, D.
Molecular orbital study of the selective hydrogenation of acetylene in aqueous metal-catalyzed tetrahydroborate systems 219
Lowry, S. R., see Ying, L.-S. 51
Lu, B. T., see Liu, S. Z. 219
Lu, K.
— and Ma, L.
A program package for data analysis in extended x-ray absorption fine-structure spectroscopy 143
Lykos, P.
Chemists and computers: now one on one 1

Ma, L., see Lu, K. 143
Maine, P. A. D., De, see De Maine, P. A. D. 73
Marengo, E., see Marsili, M. 33
Marsili, M.
—, Marengo, E. and Saller, H.
SPECTRE: an approach to an expert system in chemometrics 33
Meng, Y. M., see Liu, S. Z. 219
Meyer, E.
— and Sens, E.
KOWIST: a computer-assisted systematic approach to finding new compound classes of pesticides 135

Namboodiri, K., see Venanzi, C. A. 151
Nianyi, C.
Chemical pattern recognition research in China 175
Novič, M., see Zupan, J. 63

Petkovski, D.
The role of computers in simulation, optimization and control 109

Razinger, M., see Zupan, J. 63
Renjun, Z.
— and Jin, Z.
The middle-value iteration algorithm and its application in investigating hydrocarbon pyrolysis reactions 195
Runqing, W., see Zequn, Y. 189

Saller, H., see Marsili, M. 33
Sens, E., see Meyer, E. 135
Shuzeng, Z., see Zequn, Y. 189

Tomellini, S. A., see Ying, L.-S. 51

Ugi, I., see Bauer, J. 123

Venanzi, C. A.
— and Namboodiri, K.
Electrostatic features of molecular recognition by cyclic urea mimics of chymotrypsin 151
Venanzi, C. A., see Venanzi, T. J. 213
Venanzi, T. J.
— and Venanzi, C. A.
A molecular electrostatic-potential study of acesulfame 213

Wang, P., see Dong, Q. 181
Wu, R.
Monte Carlo method in calculation of the melting temperatures of silicate glasses 199

Xiaoheng, T., see Zequn, Y. 189
Xiaomin, W., see Chuanjie, G. 169
Xiyun, L., see Chuanjie, G. 169
Xu, L., see Zhang, J. 163
Xu, Z., see Dong, Q. 181

Ying, L.-S.
—, Levine, S. P., Tomellini, S. A. and Lowry, S. R.
Expert system for interpretation of the infrared spectra of environmental mixtures 51

Zequn, Y.
—, Shuzeng, Z., Xiaoheng, T. and Runqing, W.
Automated identification and plotting of the function $y=f(x)$ 189
Zhang, J.
— and Xu, L.
Studies of correlations between substructures and ^{13}C-NMR chemical shifts for automated interpretation of structure 163
Zhihong, X.
— and Leshan, W.
The development of a chemical engineering data base 115
Zupan, J.
—, Bohanec, S., Razinger, M. and Novič, M.
Reduction of the information space for data collections 63
